Gentlemen:

I am sending out the enclosed summary report for Market Sample 30 to collect in one place the final "TN&CO" figures. The previously reported values for retested brands replace those shown in April's report. A second listing containing "tar" and CO rounded to whole numbers and nicotine to one decimal are also included.

The rounded values on each list are derived from the original calculation of the data, and they may not always be consistent with each other. For example, a calculated value of 13.451 would be rounded to 13.5 on one list and 13 on the other. The 13.5 would not be rounded to 14.

Sincerely,

  
William L. Steele

Enclosure:
